

Continuing Education In Anodizing

2-day seminars in quality anodizing practices now available!

Learn best practice anodizing, tips and techniques with the new Continuing Education in Anodizing classes held at the world's only Technical Center devoted to anodizing! The course is available to manufacturers, engineers, anodizers and all others interested in learning more about best practices in anodizing. The class will be held at the METALAST Technical Center in Minden, NV. The class will be presented by the professional staff at METALAST, who have years of extensive experience in the field of metal finishing. METALAST has published 16 papers at technical conferences and has also authored over 50 in-house studies on anodizing.

Upcoming dates for 2011 classes:

- January 12-13
- February 9-10
- March 9-10
- April 13-14

METALAST conducts the training courses to discuss aluminum anodizing process and history, the anodizing industry, process capabilities and limitations, and the benefits of process control. The course takes attendees through basic principles in anodizing, pre- and post- treatments, proper racking techniques, chemistry, bath maintenance, and then into a discussion on the benefits of process control. Quality control and troubleshooting are also major topics of the class. All attendees will participate in sample processing in the METALAST laboratory utilizing the METALAST JobPro to apply what was learned.

METALAST plans to continue training and education as a means to inform manufacturers and anodizers about sound anodizing practices and process control in an effort to improve the quality of finishing. The training classes allow manufacturers, engineers, and anodizers to sit in the same room and discuss problems, concerns, and potential solutions, with METALAST mediating the discussion and providing insight into troubleshooting and quality anodizing practices.

METALAST will confirm that the class will take place thirty (30) days before the start date. Payments must be received fourteen (14) days prior to the class. All classes are subject to cancellation. Class cost - \$1,500 dollars per person. Course materials will be provided and available for attendees to take with them. Companies may send more than one employee, but space is limited. Travel and hotel arrangements are the responsibility of attendees. Please contact METALAST (888-METALAST) or go to www.metalast.com/visit for information on itineraries, room rates, travel information, and to confirm your attendance at the seminar.

Please detach and return with payment information - or fax back to METALAST at (775) 782-1008.
